Skull Crack CWMU Description

The Skull Crack-Moose CWMU is south of Causey Reservoir. Part of the Weber - Morgan County line forms the boundary of this Unit in the southeast, the Unit overlaps this boundary in the south. Highest elevation is the west is 7700 feet elevation, rising to **8200 feet** in the middle of the Unit, then dropping again to 8000 feet elevation. Many small drainages drop off to the north and west. The Pete Nelson Hollow, ranging from 6400 feet to 8000 feet is one of these drainages. Skull Crack (5800 feet to 8000 feet), Mill Hollow (5800 feet to 8000 feet), Mill Canyon (5600 feet to 7300 feet), Magpie Canyon (5400 feet to 7800 feet), Quarry Hollow (**5300 feet** to 6600 feet), and Sheep Herd Creek (5700 feet to 8000 feet) are other small drainages on the Unit.

The Skull Crack-Moose Cooperative Wildlife Management Unit (CWMU) has a mixture of two (2) land cover types with strong contribution from a third. Rocky Mountain **Aspen Forest and Woodland** (22) is the most common, but Inter-Mountain Basins Montane **Sagebrush Steppe** (62) is almost as common. Rocky Mountain Gambel **Oak-Mixed Montane Shrubland** (41) is also very common. Another common type is Rocky Mountain **Bigtooth Maple Ravine Woodland** (23). Rocky Mountain Montane Mesic **Mixed Conifer Forest and Woodland** (32) and Rocky Mountain Montane Dry-Mesic **Mixed Conifer Forest and Woodland** (30) contribute minor amounts to the Forest and Woodland character of the Unit.
